## Your Gateway to Global Networks and Markets

Since 2013, the event has been organized by Ossa under the name ICDDA, and its seventh edition will be held on 14–16 October 2026 in Ankara Congressium under the new name IDA Türkiye.

Empowered by Türkiye's strategic location, the Industrial Cooperation Days in Defense and Aerospace bring together leading domestic and international companies, decision-making authorities, technology developers, and experts from the defense and aviation industries under one roof.

Covering a wide spectrum from land, naval, aviation and space defense systems to security technologies, and from civil-military aviation infrastructures to smart logistics solutions, supplies, materials, and equipment, the event creates valuable opportunities for cooperation and technology transfer.

Participants will have the chance to explore the most up-to-date defense technologies, closely follow sectoral developments, and establish a platform for international agreements.

### IDA Türkiye, Industrial Cooperation Days in Defense and Aerospace

Supported by the Ministry of National Defence of the Republic of Türkiye and the Presidency of Defence Industries of the Republic of Türkiye, organized under the management and responsibility of Ossa, and coordinated by NGF Exhibitions Inc., the event will be an international meeting point where the latest developments in land, naval, aviation, and space technologies are showcased and the foundations of strategic collaborations are established.
